### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: applicant recites a railway train friction management system for managing and controlling an application of one or more of a plurality of friction modifying agents to an area of contact between a railway wheel and a railway rail over which the wheel is traversing to selectively modify the coefficient of friction at the contact area. The system is comprised of a sensor for detecting a parameter relating to the operation of the railway train, a controller responsive to the sensor for selecting at least one type of friction modifying agent as a function of the detected parameter and for determining a period of time for application of the selected friction modifying agent to the rail as a function of the detected parameter. The device is further comprised of an applicator responsive to the controller for applying the selected type of friction modifying agent to the area of contact between the railway wheel and the rail for the period of time.

The prior art, taken singularly or in combination, does not adequately disclose the features recited in the instant claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
